

Fruit processing machinery

Treatment equipment

HOMOGENIZER H1000 / H2000

TREATMENT

HOMOGENIZER

H1000 / H2000

TREATMENT

Homogenization

Description

The homogenizer is used for reducing and standardizing the size of the particles of fruit juice under conditions of extreme pressure, shear, turbulence, acceleration and impact.

The homogenization process provides a much more stable product with a better shelf life.

Main features:

- Stainless steel shell.
- 3 pistons.
- Smashing granularity between 0.1 μm and 2 μm , average size of $\leq 1 \mu\text{m}$.
- The pointer of pressure gauge is steady, and also the range of swing is less than 2 MPa (20 bar).
- Noise of transmission is lower than noise of motor.

		H1000	H2000
Capacity	lit/h	1000	2000
Dry weight	kg	650	880
L	mm	640	945
H	mm	1050	1200
W	mm	770	995
Power source	kW	11,0	18,0
