Pulping

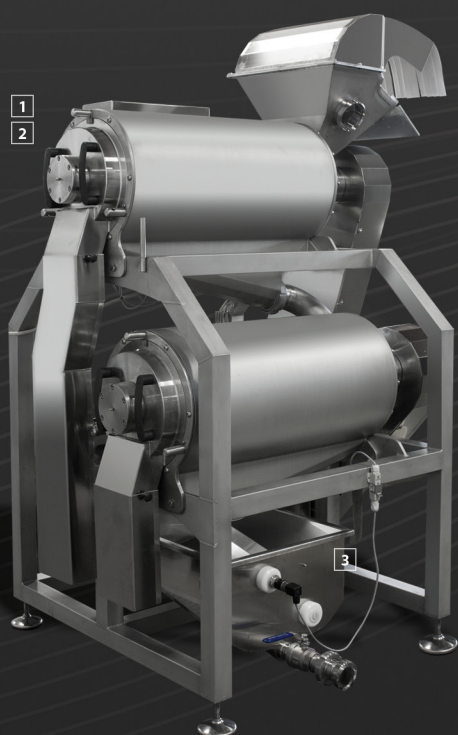

### Description

The Destoner - Pulper machine group is designed for destoning and pulping stone fruit (machine in cascade position). The achieved product after pulping is fruit purée.

#### Main features:

- Entirely made of stainless steel.
- Sieves with different sizes of perforations can be mounted (depending on the kind of fruit).
- Equipped with dumping hopper and connection for fruit at the entrance.
- Equipped with connection for purée at the outlet.
- Removable purée collection tray.
- Quick and easy cleaning after use.
